

Follow the sound!

Main purpose: To distinguish between sounds and to remember patterns of sound

NOTE-Body percussion means making sounds with your body, like clapping, tapping, foot stamping.

Sit down or stand opposite your child. Make a body percussion pattern, such as...clap, clap, clap.. See if your child can listen carefully and copy exactly what you do. Then try another one, such as... clap, clap, stamp. Can they copy you again? Make up other patterns using body percussion. When your child is confident at copying you, they can make up some simple patterns for you to copy.

Questions you could ask-*Is my sound loud or quiet? Did it get faster or slower?*
