

Year 2

In Maths this week year 2 having been learning how to subtract using the column method.
 Ryan completed both orange and red challenge without any support
 Wow! I am so amazed by your work.

Mum and dad
what is that?
Sirin sound is
it the peas?

why can't
you see
the baddy?

I am
talking
you to
the peas.

you came
stop me
because you
to light.

wow!
mum and dad
look at the
creation peas!

For English we watched a short film that has no speaking. The children had to use their imagination to predict what the characters were saying. Tehila had some very good ideas on what she thought the characters were saying.

For our ECO afternoon, year 2 were looking at Global Warming. We spoke about how and why the earth is getting warmer. We completed an experiment on Green House Gases.

First we made our own green houses.

We wrapped our boxes in cling film so no air could escape.
We took the temperature inside and outside of the green houses.
We took them outside and left them for 5 minutes.
After 5 minutes we took the temperatures again.

We discovered that the temperature inside the green houses, where the air was trapped, was hotter than the temperature outside the green house.
The temperature change was around 5.c.
Gabriel said “We now understand that our earth is getting hotter because the air is trapped by the bad gases.”
